## Safety data sheet (SDS)

Date of Issue 2024/11/27

1 Product and company identification		
1 Product and company identification	Forrito magnet	
Product name Size	Ferrite magnet Any sizes	
	•	
Company name Add.:	Niigata Seiki Co., Ltd. 5-3-14 Tsukanome, Sanjo-city, Niigata-pref. Japan zip 955-0033	
Telephone	0256-33-5502	
•		
Facsimile	0256-33-5528	
2. Hazards identification		
[GHS classification]		
Classification name	Not classified as hazardous materials	
CAS NO.	Not applicable	
Official gazette reference No.	Not applicable	
UN classification and nos.	Not applicable	
3 Composition/Information on ingredients		
[Chemical character]		
Chemical state	Strontium ferrite oxide compound	
Composition	Strontium oxide 10%	
	Iron oxide 89%	
	others 1%	
Chemical formula and structure	SrO • 6Fe2O3	
Plate composition	No plated for standard product	
JP official gazette reference No.	No	
UN classification and UN Nos.	No	
4. First aid measure		
If inhalation	N/A under normal conditions of use. But if you feel sick when inhaling dust occurred by	
I maladon	processing, move to fresh air and keep at rest in comfortable position for breathing.	
If skin	N/A under normal conditions of use. But if molten, cool immediately in clean water,	
	treat as ordinary burns. Under normal conditions of user, wash water with soap.	
If in Eyes	If you get a foreign objects (debris or dust) in your eyes, immediate rinse eyes with	
	clean water. Do not rub eyes.	
	If there is a sensation of foreign matter, rinse the eyes thoroughly until the sensation	
	disappears, and get medical attention immediately.	
If swallowed	If debris or dust is swallowed, induce vomiting by drinking water.	
	Get medical attention if you feel unwell.	
5 Firefighting measures		
Suitable extinguishing media	Water, powder extinguish agent, carbon dioxide gas, dry sand.	
Unsuitable extinguishing media	Not applicable	
6 Accidental release measures		
	- To avoid the high risk of magnetic field, magnets may affect the normal operation of	
mend and emergency procedures		
<b>U</b> , 1	implanted electronic medical devices, such as pacemakers.	
Environmental precautions	implanted electronic medical devices, such as pacemakers. Collect in a sealable container and dispose of container as industrial waste.	
<b>U</b> , 1	implanted electronic medical devices, such as pacemakers.	
Environmental precautions	implanted electronic medical devices, such as pacemakers. Collect in a sealable container and dispose of container as industrial waste. Dispose of powder, powder, dust, etc. according to No. 13 Disposal conditions as described below.	
Environmental precautions	implanted electronic medical devices, such as pacemakers. Collect in a sealable container and dispose of container as industrial waste. Dispose of powder, powder, dust, etc. according to No. 13 Disposal conditions as described below. It No special treatment required for solid state. If spilled, collect in container	
Environmental precautions Methods and materials for containmen	implanted electronic medical devices, such as pacemakers. Collect in a sealable container and dispose of container as industrial waste. Dispose of powder, powder, dust, etc. according to No. 13 Disposal conditions as described below.	
Environmental precautions Methods and materials for containmen and cleaning up.	implanted electronic medical devices, such as pacemakers. Collect in a sealable container and dispose of container as industrial waste. Dispose of powder, powder, dust, etc. according to No. 13 Disposal conditions as described below. It No special treatment required for solid state. If spilled, collect in container However, fine powder generated by processing, etc. should be removed with adequate

## Safety data sheet (SDS)

[Storage precautions] Incompatible chemical materials Storage conditions (Conditions for safe storage, including any incompatibilities)

No data

Storage conditionsAvoiding direct sunlight and long-term storage in high temperature and humidity.(Conditions for safe storage, includingStore away from heat and ignition sources

8 Exposure controls and personal prote	ection
[Exposure control]	
Exposure limits	Not established
Tolerable Concentrations of	Not established
biological indicators	
[Individual protection measures]	
Suitable protective equipments	Long sleeves, long pants, gloves etc., should be used for protection during processing,
Suitable protective equipments	if necessary.
9 Physical and chemical properties	ii necessary.
, , ,	
[Appearance]	
Physical condition	Solid-state under general conditions
Form	Round, Ring, Square
Color	Silver
Odor	Odorless
Freezing point boiling point and range melting point and	No data
Flash point, auto ignition temperature	No data
Flammability upper and lower limit	No data
Vapor pressure/density	No data
Specific gravity (relative density)	5.0g/cm3
Solubility	No data
[Others]	
Reaction with water	Oxidizable
Oxidizing	Yes
OAGZING	
10 Stability and reactivity	
[Conditions to avoid]	
Electrostatic discharge	Stable under normal condition of use and storage.
Shock $\cdot$ Vibration	Avoiding for brittle
[Incompatible materials]	No data
•	No data
[Hazardous decomposition materials]	NO Udla
11 Toxicological information	
Acute toxicity	No data
Skin corrosiveness and irritation	Friction causes loss of sebum on the fingers and turns to red chafing.
Serious eye damage or irritation	No data
Respiratory or skin sensitization	No data
Germ cell mutagenicity	No data
Carcinogenic	No data
Reproductive toxicity	No data
Specific target organ toxicity Single exp	
Specific target organ toxicity repeat exp	
Absorption respiratory organs toxicity	No data
12 Ecological information	
Ecotoxicity	No data
Persistence and degradability	No data
Bioaccumulative	No data
Mobility in soil	No data
Hazards to ozone layer	No data
13 Disposal considerations	
[Safe and environmentally suitable	In accordance with the law (Waste Disposal and Public Cleansing Law),
disposal method]	consign disposal to an industrial waste disposal company licensed by the prefecture.
[Proper disposal of container and	Proper containers and packaging should be used in accordance with the instructions

## Safety data sheet (SDS)

of the industrial waste disposal contractor.

14 Transport information		
[Code international transport regulations and classification]		
HS code	8505.11	
Others	Load the cargo without tipping over or falling. Take preventive measures to prevent injuries due to collapses etc. Avoiding rough handling as it is easily crack	
15 Regulatory information		
Substance to be notify for Industrial safety and health law	N/A	
Substance to be labeled for Industrial safety and health law	N/A	
Poisonous and deleterious substances control law	N/A	
Pollutant Release and Transfer Register N/A law (PRTR)		
Waste disposal and public cleaning law	I	
Other local ordinances to be followed		
16 Other information		

Magnetic leakage precautions for air-transport cargo.

Packaging]

For General cargo transport, Does not exceed 0.418A/m (0.00525 gauss) or, Compass deflection of 2 degrees or less at a distance of 2.1m from appointed point. (In case e entire inside of the packaging of the magnet or magnetembedded product is surrounded by a steel plate (0.5 mm or thicker) with no gaps)
